

# Document Verification With Facial Comparison (DVFC)

Authenticate customers across the globe with W2's Document Verification with Facial Comparison (DVFC) solution and experience a frictionless, faster onboarding journey.

By implementing the DVFC services into your customer onboarding journey you can keep customers engaged in a smooth end to end process and verify their identity in real-time, whilst offering a superior customer experience.

## Key Benefits

Automatic, real time engine and responses.

Can verify over 6000 global documents.

Supported by mobile SDK's in multiple frameworks & API end points for web journeys.

DV & FC elements can be independently used for maximum flexibility.

Ability to add bespoke templates to the global document library.

Deter fraudsters by linking verified documents to users via live tested facial comparison.

## Use Case

Utilising the document verification and facial comparison technology enables global growth whilst remaining compliant. Particularly powerful in markets where traditional eKYC solutions do not offer robust data coverage of the population. Real-time document authentication and the facial comparison technology can be used for step-up authentication of existing users where transactions require additional compliance checks.

## Complementary Services

Manual Document Verification

Global eKYC

AML Services
